

D96-DMX Series

- The D96-DMX is a state-of-the-art LED driver featuring DMX512 capabilities. Its advanced dimming control not only allows for immediate and consistent production of light, but also allows for greater control of color and brightness from any angle. This driver is RDM enabled, and can receive commands from DMX lighting controllers, allowing for easy integration and commissioning. This LED driver is the perfect choice for creating dynamic and customized lighting effects, and is ideal for venues, special events and other professional lighting applications.

Input Voltage	100-277VAC
Output Voltage	24VDC
Output Power	96W
Constant Voltage Output	4 Channel PWM
DMX Input	RDM/DMX512
Max Load Current	4A/CH
Max Load Power	24W/CH
Dimming Range	0-100%
Operating Environment	-20C-50+C
Dimensions	9.65" x 2.37" x 1.26"
IP Rating	IP20
